4. First Aid Measures

Skin contact	Rinse with plenty water. If experiencing skin symptoms, consult a physician.
Eye contact	Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If experiencing eye symptoms, consult a physician.
Inhalation	Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms, consult a physician.
Ingestion	Rinse mouth and give large quantities of water to drink. If feel unwell, consult a physician.

5. Fire Fighting Measures

Types of hazard	Highly flammable liquid and vapor! May release vapors and form explosive mixtures. May cause fire or explosion when exposed to high heat or flame. Contact with strong oxidizers may cause chemical reaction even fire. Containers can build up pressure if exposed to heat and/or fire. Vapors are heavier than air, can flow along surfaces to distant ignition source and flash back.
Hazardous	Carbon oxides and other toxic oxides fumes.

combustion products	
Fire-fighting measures	Move the containers to open ground. Use water Spray to reduce the temperature of the fireground and containers until the fire is extinguished. Suitable extinguishing medial: Water spray, dry powder, sand, water-resistant foam, carbon dioxide, etc.
Special Information	Use self-contained breathing apparatus and wear protective clothing. Avoid contact with eyes and skin.

6. Accidental Release Measures

Isolate the hazard area and keep unnecessary and unprotected personnel from entering.
Removal of ignition sources. Use non-sparking tools and equipment.
Wear self-contained positive pressure breathing apparatus and anti-static clothes.
Soak up the leakage with inert absorbent material and recover into the suitable, closed containers for disposal.
Flush the contaminated area with plenty water. Avoid release to environment.

7. Handling and Storage Measures

Handling	Keep containers tightly closed when not in use. Ensure good ventilation/exhaustion at the workplace. Use explosion-proof electrical/ventilating/lighting equipment and non-sparking tools. Avoid static discharges. Keep away from sources of ignition or heat. No smoking.
Storage	Store in a cool, dry, ventilated area and equipped with adequate fire fighting equipment.

8. Exposure Controls / Personal Protection

	Component	CAS No.	Limited Values
Occupational exposure limits	Alcohol	64-17-15	1000 ppm TWA (OSHA) 1900 mg/m ³ TWA (OSHA) 1000 ppm TWA (ACGIH) 1900 mg/m ³ TWA (NIOSH)
Engineering controls	Use explosion-proof electrical/ventilating/lighting equipment and non-sparking tools. In general, dilution ventilation is a satisfactory health hazard control for this substance. However, if the workers experiencing symptoms, a local exhaust system should be considered. Maintain eye wash fountain and quick-drench facilities in work area.		
Inhalation protection	If the exposure level is high and engineering controls are not feasible, a half face piece or full- face piece particulate respirator may be worn. For emergencies or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. WARNING: Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.		
Eye protection	Use safety goggles or face protections to protect against possible eye exposure.		

Skin protection	Wear protective gloves and anti-static clothing.
Other protection	No information.
